

### Manufacturing Technologies

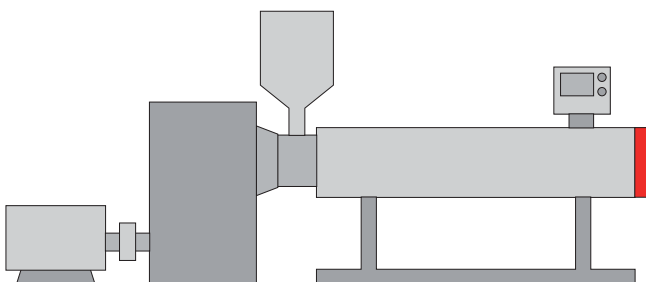

FluidSolids granulates are processed using the standard methods of industrial mass production for a safe production using your existing machinery. The biocomposites feature outstanding mechanical properties, short cycle and processing times and a competitive material pricing.

#### Compression Molding

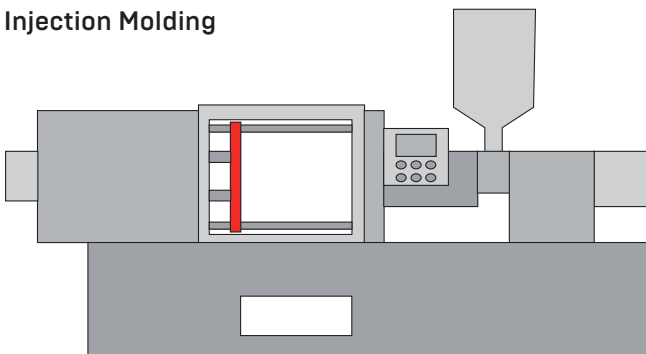

Data	Unit	Number
Min. Material Thickness	mm	2.0
Various Thicknesses		possible
Undercuts		possible
Tooling Cost		moderate
Cost per unit		high

#### Extrusion

Data	Unit	Number
Min. Material Thickness	mm	1.5
Various Thicknesses		possible
Hollow Profiles		possible
Tooling Cost		moderate
Cost per unit		moderate

#### Injection Molding

Data	Unit	Number
Min. Material Thickness	mm	1.0
Various Thicknesses		possible
Undercuts		possible
Tooling Cost		high
Cost per unit		low
